This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

☐ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).
- b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:
- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

2. ☐ Certain claims were found unsearchable (See Box I).

3. ☐ Unity of invention is lacking (See Box II).

4. With regard to the title,

- ☒ the text is approved as submitted by the applicant.
- ☐ the text has been established by this Authority to read as follows:

5. With regard to the abstract,

- ☐ the text is approved as submitted by the applicant.

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

A calibration method for print engines is disclosed herein. In a preferred embodiment, the method comprises the steps of:
providing a calibration chart (101) having a first array of reference colours thereon;
printing a separate test sheet (102) at step (301) from a said print engine; the test sheet (102) having a second array of test colours thereon, each test colour corresponding to one reference colour of the first array;
arranging both sheets (101, 102) together;
scanning the sheets (101, 102) at step (302) to capture a digital image of the reference and test colours;
analysing the colour characteristics at step (303) to obtain the colour difference between corresponding pairs of reference and test colours; and compensating any colour difference at step (304) by automatically adjusting the printer in accordance with the colour difference.
